Proposed Policy Change to Outside Member Requirement on Doctoral Committees

Choose a Doctoral Program Committee

Every student must form a faculty committee to oversee the process of dissertation completion.

All members of the doctoral program committee participate actively in the activities of the doctoral student at all the stages of the student's career at MU, except the qualifying examination or process.

The doctoral program committee is composed of a minimum of four members of MU graduate faculty.* Three members must come from the student's academic department or interdisciplinary degree program. The fourth may come from either a different academic department/interdisciplinary degree program at MU or from within the student's home unit. Every department and interdisciplinary program must have a formal documented policy that establishes whether the fourth member is required to be from outside the student's department or program. The fourth member's role includes ensuring procedural fairness and objectivity, maintaining appropriate standards for scholarly work, offering interdisciplinary perspectives and complementary expertise. As such, having a fourth member from outside the department or program is an important consideration. At least two of the doctoral committee members, including the student's advisor, must be MU doctoral faculty.

To determine whether a faculty member has graduate or doctoral faculty status, refer to the list of faculty in each academic department or interdisciplinary degree program in the University catalog.

***Exceptionally, the Doctoral Nursing Program uses a three-member committee.**

Proposed Academic Policy Language

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty is a basis for disciplinary action. Academic dishonesty includes, but is not limited to, cheating, plagiarism, falsifying and fabricating data, or submitting any fraudulent document in academic work, research, and creative activity. In all cases of academic dishonesty, the supervising faculty member makes a judgment about the student's academic performance and reports all incidents to the Office of the Provost.

Refer to the Collected Rules and Regulations, Section 200.010, Standard of Conduct, and Section 200.020, Rules of Procedures in Student Conduct Matters for more specific details. (The Collected Rules are available on the University of Missouri System web site.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Provost for investigation.
