 - The academic culture of ‘yes-ing’ can leave graduate students and postdocs with a bitter taste of guilt, resentment, and demotivation. Yet the choices you make now shape your next steps and your career identity. This 3-hour interactive workshop will introduce you to a practice of continually setting boundaries in response to your why - your values and purpose in your life and work. A critical part of this conversation is what are your patterns of overing, ie overscheduling, overcommitting, overworrying, and overwhelm, and how to get back in alignment with your values and purpose while negotiating the political and bureaucratic systems of academia. Bonus: Hot Box cookies will be delivered!
